Lighthouse Report Viewer

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

NAMES AND LABELS Image elements do not have [alt] attributes <object> elements do not have [alt] text These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader. **CONTRAST** Background and foreground colors do not have a sufficient contrast ratio. These are opportunities to improve the legibility of your content. **NAVIGATION** Heading elements are not in a sequentially-descending order These are opportunities to improve keyboard navigation in your application. ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.
